Rudy did a great job to explain where New Era was going to provide me with more power at less cost from their panels compared to a competitor. I have 30 panels on my roof installed previously in 2017. They will be incorporated to supply more solar power to my home. I felt no pressure to complete the deal with Rudy.

Great experience with Ruben and Boris who installed 2 ceiling fans in my home. Communication was clear and prompt setting up the job. On the scheduled day, I was given a text update about the arrival time, as well as a follow up at completion. Everything was very courteous and professional. Plan on using them again for my next home project. Highly recommend!

So far, New Era Solar Energy has been good to work with. They are very speedy in their responses.

The portal is also very easy to use. The only thing I'd recommend is making a clear red flag or some indicator if the customer owes something (a signature, etc. if that doesn't exist already). Also, scrolling down the page takes longer than expected and isn't perfectly smooth.

Lastly, I have noticed a couple of discrepancies within our contracts, so I've had to correct them and have them re-sent to me. For example, there was a comma in the wrong place on the amount.

Overall, I still would recommend working with them as they are local (US) and have been easy to work with.

New Era Solar completed our installation a while ago, and I just want to express how happy we are with our decision to choose them. They were professional from start to finish. A big shoutout to the installation team for doing an outstanding job. I'm already recommending them to my family and friends!

I saw 4 reviews here with 5 stars that are employees of the company and dont have solar. Long install times and IF YOU PASS INSPECTION.... BIG IF ! you' ll be lucky to have them turned on in a timely manner. TRASH COMPANY and very shady! Your better of with another company.

All went as planned and all the team were punctual and worked with a high standard!

Thank you!

Highly recommended!!

I hate to have to write reviews like this. I try to give everyone the benefit of the doubt. But I do not recommend this company. While the representative Steven I talked too seemed genuine and honest on the phone like so many others the company left me hanging with promises of help but they did nothing. They claimed they would come and give me an estimate but they never followed through on what they said and after repeated contacts all they did was to make excuses and further claims of help but never made any move to do anything and then finally they quit responding at all and that is VERY POOR business practice. Thumbs down New Era Solar!

I'm not one for posting very often. But I just had to let people know how unbelievable these people are to work with. From the first step to the last. I was able to talk to someone and get every question answered with no pressure or hurry. It was very nice to

get a live person on the phone these days. Steve was so easy to work with and very knowledgeable and passionate about his business!! Hands down the very best company to deal with having zero games and quik professional results!!

We purchased a system from New Era Solar and everything went smoothly. I can't say enough about how easy the entire process was. Steve, our rep, kept us informed all the time. Even taking pictures for us that were needed by engineers when we were out of town. The install crew was amazing and finished within 6 hours. The final inspection and approval was done quickly and we flipped the switch to get the system running. We are now producing enough Solar power to operate our home daily.

Everything New Era Solar told us is exactly as it happened. They are hardworking, honest professional people. I will recommend them anytime.
